

Pressure testing certificate

Equipments:

Tested equipment was two (2) ROV identified as RS-0062 & RS-0060-A ,
and four (4) led lighting units.
All the unit were set up in normal operating condition with dummy connectors on through hull fittings.

Manufacturer:

Manufacturer of the units is MarineNav.

Tests description:

Two (2) tests were conducted:

1. Pressurizing and maintaining a pressure equivalent to one hundred (100) meters of water during a period of ten (10) minutes.
2. Pressurizing and maintaining a pressure equivalent to four hundred (400) meters of water during a period of sixty (60) minutes.

Results:

In all cases, the ROVs & the lighting units pressure vessels have demonstrated their ability to withstand applied pressures without leaks or any apparent damages.

References:

None

Personal :

Tests were conducted Thursday, June 11th at Innovation Maritime's workshop.
Samuel Desgagné, mechanical engineering tech., was the pressure vessel operator under the supervision of Patrick Fortier-Denis, professional engineer.

I, hereby, certify that the ROV RS-0062 & RS-0060-A , and the four (4) led lighting units ,
are able to operate at their designed depth of four hundred (400) meters without hull damage.
